## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's amendment filed on November 26, 2004 has been entered. No claims have been amended. No claims have been cancelled. No claims have been added. Claims 1-36 are still pending in this application, with claims 1, 11, 21, and 29 being independent.

### ***Claim Rejections - 35 USC § 102***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Lamb et al (US 6,747,970).
4. In regards to claims 1, 2, 11, 12, 21, 22, 29, and 30, Lamb discloses a system, method, and computer program product for administering a conference call, comprising: a invitation object (instant message), comprising: number information corresponding to a call-in number for a conference call; code information corresponding to a pass code necessary for entry into the conference call; and time information corresponding to a data and time of the conference call; and logic for establishing a connection to the conference call based upon the number information, the code information, and the time information (col. 38 Table 1 (331) authorization information and (334) call invitations, col. 53 lines 37-55, col. 54 lines 8-14, and col. 60 lines 4-17).

5. In regards to claims 3, 4, 5, 13, 14, 15, 23, 24, 25, 31, 32, and 33, Lamb discloses the conference call administration system, method, and computer program product, wherein the number information and the code information are encrypted (col. 38 Table 1 (331) authorization information).
6. In regards to claims 6 and 16, Lamb discloses the conference call administration system and method, wherein the invitation object is electronically transmitted to a prospective participant (col. 53 lines 37-55, col. 54 lines 8-14, and col. 60 lines 4-17).
7. In regards to claims 7 and 17, Lamb discloses the conference call administration system and method, the invitation object further comprising a list of authorized participants of the conference call (col. 16 lines 25-42).
8. In regards to claims 8, 9, 19, 20, 27, 28, 35, and 36, Lamb discloses the conference call administration system, further comprising a calendar object to which the invitation object is attached for transmission to a prospective participant of the conference call (col. 60 lines 4-17).
9. In regards to claim 10, Lamb discloses the conference call administration system, the invitation object further comprising: contact information corresponding to a call coordinator (manager) for the conference call; and status information corresponding to current status of the conference call (col. 55 lines 19-34).
10. In regards to claims 18, 26, and 34, Lamb discloses the method and computer program product, further comprising the step of contacting the call coordinator for resolution of a failure to establish a connection to the conference call (col. 57-58 lines 37-5).

### ***Response to Arguments***

11. Applicant's arguments filed 11/26/04 have been fully considered but they are not persuasive. Applicants argue that Lamb et al do not teach or suggest a structure comparable to a vlnvitation object, i.e. an object that can be transmitted between users and includes "logic for establishing a connection to [a] conference call". Examiner respectfully disagrees with this argument. Lamb et al do teach and suggest a structure comparable to a vlnvitation object (instant message), i.e. an object that can be transmitted between users and includes "logic for establishing a connection to [a] conference call" (col. 53 lines 37-55, col. 54 lines 8-15, and col. 60 lines 4-17). Applicants further argue that Lamb et al do not teach or suggest a mechanism for invalidating the vlnvitation object. Lamb et al, however, do teach and suggest a mechanism for invalidating the vlnvitation object (col. 59 lines 3-38). Applicant states that Lamb et al do not teach or suggest encrypting a telephone number. Lamb et al do teach and suggest encrypting a telephone number (col. 38 Table 1 (331) authorization information).

### ***Conclusion***

12. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
13. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
